i dont recommend this game the controls are a bit fiddely and complecated. Hello friends. This dlc is ethical! It adds alot of genki weapons and stuff. Made for professor genki fans!

Recommended because i think this stuff is quite funny to add to the game.. game suffers from nobody playing, want to get gear after max lvl- to \u2665\u2665\u2665\u2665ing bad nobody plays cause the major bugs and issues took forever to address and balancing is a joke.. Never doubt a classic. Worth it on a sale, but I'm hard-pressed to recommend this otherwise. It does a really good job of tickling that nostalgia bone for old school adventure gamers, but it does quite a number of things terribly. Tedious walking, a ton of unnecessary detail that just takes up time and adds little to either the atmosphere or the story, and a protag that likes to hear himself talk without actually saying anything of substance. There's also nothing impressive about the writing itself. The characters are bland, the dialogue could be much better, and the story's lackluster. The voice acting's kind of decent, especially for an indie production, but it's hard to ignore some very spotty moments, like that Chinese "cab driver", etc., that I could have done without.. This game is so much fun. Especially in the first few hours with some friends on TeamSpeak or Discord or whatever. Seriously, try it out!

This is an amazing VN. The Localization is very, very good and full of amazing writing. The story is constantly pulling you left and right. The game mechanics are also really neat and make the game more engaging, and there are some really great Bad Endings (#35 is one that has particularly come to mind). At every hour, just as the game makes you think things can't get much more ridiculous, but they continue to top themselves. I'm not very good at writing reviews but this is just a really, really good VN. Even for \$50 it is still very worth it, although if you're low on money and stubborn then you could just wait for a sale. (Just so it is said, I definitely have way more than 20 hours, but I played most of the game offline and the time never actually registered on steam.)

If anybody at Spike Chunsoft is reading this, PLEASE, PLEASE, PLEASE localize Machi. If that VN is just as good as this one, if not better, then I would love to read it.. The Antithesis of the "Princess Maker" type of games. This game is of mature subject matter, and while nothing explicit is shown or stated outright, it is there inbetween the lines.

Aside from the obvious murdering of your faux daughters.

### **Things to Expect:**

- Repetition without a mix-up of gameplay.
- A decidedly gothic story for a gothic setting.
- You play as a villainous character.
- A game length of roughly 4-5 hours, more if you chase after achievements.
- Waifus? If you're into that sort of thing. You do have to murder them to complete the game.

### **Story**

The driving force of the whole process of murder is Faust's desire to restore life to his deceased daughter. There is little to the game's story beyond that and it's ultimate conclusion. There are small tid-bits of world building given by the villagers. But ultimately the narrative focuses on Faust and his mad science. There is little left for self-interpretation, and the tone of the story is constant through the whole of the game. Make no mistake, this is a horror story.

### **Gameplay**

The core of the game is resource management. You have Gold, various alchemical ingrediants, various gifts, ritual items, and the monster daughters to keep an eye on. Gold pays for ingrediants, ingrediants are combined into monster daughters, gifts are given to the daughters to make them happy, you make them work for gold to buy everything but more monster girls.

Your faux daughters are then sacrificed to begin a "High-Low" guessing game. Finding the exact amount of Joy, Sadness, Anger, and Fear needed to constitute a soul completes the game. There are a few ways to completely lose, in which the game auto-deletes your save file and forcing you start over from the beginning. Those ways are:

- Letting your daughter's body (the non-monster) rot totally.
- Treating 20 monster daughters poorly enough that they run away from your home.
- Failing to complete tasks taken by villagers, thus killing their trust in you. (Have yet to test or see if this is an end state.)

### **Aesthetics**

The game does not perpetuate any sort of mood beyond somber, horrific, and unsettling. The art is appropriately dismal but with a hint of elegant wonder. There are a couple instances of flounder mouth, but does not ruin the art. The music is a simple loop of a single track, sparing a couple of differing scores to fit various cutscenes. It does its job.

### **Conclusion**

I'd reccomend this game only to those that enjoy horror, and aren't terribly emotional over losing female characters they name.

If you ever wanted to be a mad scientist and execute horrible experiments on a whim, this may tickle you. The story had me intrigued enough to finish it, and while the ending sort of threw me for a loop, I can appreciate what the writers were attempting. It was fitting, if clumsily executed.. [This game is a great concept for VR. You are legless, sitting on the ground from your waist up. You can climb, crawl, & fling yourself anywhere you want on the map, even up trees! There are powerup cards that rest on your forearm and you throw them to use them. This ranges from magic windwinds to rocket launchers on your shoulders. You have a regular laser gun at your hip to use as well. Hopefully more people pick up this game because I could only find one lobby with one person in it. I think bots is a must for this game, otherwise there won't be a big enough players right now.](#)

[Pros: Awesome concept](#)  
[Movement is smooth and managable](#)  
[Lots of powerup types](#)

[Cons: Everything is blurry/grainy at distance. Anything more than 4 feet in front of you.](#)  
[This is multiplayer only, no bots. Without a playerbase this game will not last.](#)  
[.i can recomend this game... or i could recomend just using beepbox as it has more depth and is free, has more pages a finer selection of sounds.](#)

[either way a good time killer or something just for fun :\). ...need others DLC to be able to play demonspawn? 0V10. This game will drive you crazy. It will eat your mind . you won't stop until you made that level 3. and then you are hungry for more. let's get level 4. but it's too hard. if you are looking for an addiction, you found the right place. Good Luck feeding that hungry mind of you.](#)
