## FEATURES

**TRADE!** A fully simulated economy that means your actions really do matter. Travel the space highways to find profit in gigantic space cities, swarming with ships and drones.

++ Every ship you see has a task. Stop a freighter from reaching its destination and its cargo will be stopped too, causing prices to rise. ++

**FIGHT!** From small scale skirmishes to epic fleet encounters, battles in the X Universe know no limits. Choose to fight for the military, work for the police or be a lawless pirate, or if you prefer just fight when you need to defend yourself - it's up to you.

---

++ Take the action right into massive structures. Target turrets and shield generators to weaken your enemy, damage engines and jump drives to prevent their ships from escaping, or stop their factories producing to cripple their economy. ++

**BUILD!** Create your own empire! From trading stations to large factories, farms to hightech military complexes, everything can belong to you. Build for trade and profit or to strengthen your military presence and dominate your enemies.

++ Extend and upgrade your stations to make them operate more efficiently, with every element visible in glorious animated detail. Harvest your own resources to keep your empire running smoothly. ++

**THINK!** A rich, detailed history and a deep complex plot await you, but you are free to decide when and where to take part. Explore the universe at your own pace - choose your own path and create your own destiny.

++ Get up-close and personal with aliens and humans alike. Land on stations, meet people, then accept missions from them or hire them as crew members for your ships. ++

**TRADE, FIGHT, BUILD, THINK...** in the X Universe - the biggest sandbox this side of the galaxy.

This is a crisper rendition of an airport, ground textures are better and the overall quality is better than previous releases from Feelthere.

However, there are still a few bugs in the game but they don't really get in the way of controlling your airport, unless you are one of those that can't see past the bugs.

I think the bugs stem from the core package of Tower3d Pro and the coding in that rather than in this airport DLC.

If you already have the core package then you will already know this, but it shouldn't stop you from buying this add-on DLC.

It has a complex taxiway system with lots of crossovers and joining taxiways which will keep you on your toes.. Would be even better if it was in English, NO way of changing the Language to English. Uninstalled as a result, Otherwise a great game. Please translate to English or at least give us the option to change Language at the Main Menu, Not everyone can read foreign languages. This DLC has its uses for the concrete bucket, but otherwise is not much different than the other tower crane in terms of usability other than extended height advantage. If you like the game, it's a good edition, but I wish they would bring out a larger variety of heavy equipment, and optimize the game performance under the Unity engine, when in the city..

Deceptively simple. Easy to pick up and play but still difficult enough to be rewarding. It's not laugh-out-loud funny, but I still found the dialogue humorous. Lots of nooks and secrets, which appealed to me. The doors and dungeons provided some interesting puzzles. I got exactly what I wanted from it: a light, accessible Action RPG.

By far and away the most impressive part of this game is the fact that all the models and textures were built by hand. By modern standards, no, this is not a graphical standout, but for those of us who can appreciate the effort that goes into final product, this is well worth the price of admission.

. A good time waster if nothing else, but I really don't think it's worth the money. There are a lot of better games for free on Newgrounds and other sites, so I don't think this is worth it.

It looks bad, it feels bad, it is bad. its a waste of money. Neat little game that's a lot of fun with 3-4 players. My only complaint is that is a little lacking in content.. love this game you can customize your ships, build mega size ship, form fleet, etc i have alot fun with this game and with the mod it's become more fun

unfortunately this game always crash when i build so many ship. I really love this game, there's so much detail! But Ill be honest one thing that greatly dissapointed me was that I cant groom or ride the horses myself. :( I run this place 24\7 and I get to watch strangers ride my horses?! I had to spend a bunch of money to run this horse farm, my horse farm!!! But I cant ride or groom or my own horses?! WTF?! Sorry but that was kind of the mayjor highlight of buying this game. :( Really disapointed, would have been a perfect horse game otherwise. <\3. Easy to use, good debugging options and nice UI, direct Python Reference, good project managment. Everything that you can wish your python IDE has to have! :)
